MEMORANDUM

Date: July 23, 2023

Subject: L1 Classic Task Force and Hexxagon cooperation

In the spirit of collaboration and synergy, this memorandum details the agreed upon points for the cooperation between the L1 Classic Task Force and Hexxagon teams on the shared objective of developing and deploying a station, finder, and wallet. These points have been extensively discussed and mutually agreed upon by all parties involved and are outlined as follows:

I. **Github**

   Both teams will operate under the same Github organization currently owned by the L1 Classic Task Force team. The owner role will be given accordingly.

II. **Image (Terra Classic Task Force)**

   1. The alliance will be known as "Terra Classic Task Force".
   2. The responsibility of the domain "terraclassic.community" will be under the authority of Prof. Edward Kim.
   3. Statements, opinions, or views expressed by the L1 Terra Classic Task Force team members, whether in official communications, media, or public platforms, shall be considered representative of the L1 Terra Classic Task Force team only. They do not reflect the views, opinions, or positions of the Hexxagon team, and vice versa unless a joint announcement has been officially made by both teams.

III. **Technical Coordination**

   1. A single, 15-minute meeting will be held weekly to ensure smooth coordination between the teams.

IV. **Responsibility**

   1. Members of Hexxagon (https://twitter.com/hexxagon_io) will be responsible for the development and deployment of the Terra Classic Station, Terra Classic Finder, and Terra

Classic Wallet Web Extension, along with relevant dependent packages.

2. Members of Hexxagon (https://twitter.com/hexxagon_io) will be responsible for providing, maintaining, and supporting community-funded infrastructure to be used for Terra Classic Station, Terra Classic Finder, and Terra Classic Wallet Web Extension, and external public use.

3. Hexxagon will share the relevant rights and access to the "terraclassic.community" domain with Prof. Edward Kim to facilitate his effective and efficient execution of responsibilities related to the domain.

4. The L1 Terra Classic Task Force will conduct assessments and provide reports on the source code of Terra Classic Station, Terra Classic Finder, and Terra Classic Wallet Web Extension. These assessments will focus on code security. The reports will be shared with the Hexxagon team and Terra Classic public community.

5. The L1 Terra Classic Task Force will review and check all pull requests (PRs) related to Terra Classic Station, Terra Classic Finder, Terra Classic Web Extension. This review process will ensure security on code changes.

6. The L1 Terra Classic Task Force will provide required assistance to ensure the successful cooperation.

V. **Leadership Structure**

1. Members of Hexxagon will nominate a manager to work in coordination with the L1 Terra Classic Task Force manager.

2. Each manager will independently manage their own team without interference from others.

3. Any change to the manager role must be announced at least two weeks in advance.

VI. **Funds**

1. Funds will be secured in a multi-signature wallet requiring signatures from two representatives of each team, with a threshold of 3 out of 4 for approval.
2. After a community pool spend proposal passes, funds will be released from the community pool to the multi-signature wallet. From there, each team agrees to transfer the requested amounts to their corresponding wallets in a timely manner.
3. Any surplus budget from a team will be returned to the community by their respective manager.
4. Both teams agree to accept LUNC as the payment currency.

VII. **Community Proposal**
1. The L1 manager will post community proposals on behalf of both parties.
2. The Hexxagon manager will send any relevant proposal to the L1 manager for merging.
3. The L1 manager will consolidate both proposals into a single proposal for greater impact. In the event of a failed proposal, the L1 manager will post separate proposals.

VIII. **Dispute**
1. In the event of an unsolvable dispute, the cooperation will be dissolved in a mutually understanding and respectful manner by all parties involved.
2. All parties agree to refrain from hate speech or derogatory comments about the other on any media platform.

By adhering to the points above, we are hopeful that the cooperation of the L1 Classic Task Force and Hexxagon teams will be a seamless and successful one. The L1 Terra Classic Task Force will promptly add Hexxagon team members to the L1 GitHub organization as owners upon the signing of this memorandum. Hexxagon will initiate the transfer of the Station, Finder, Wallet Web Extension, and relevant

packages GitHub repositories to the L1 GitHub organization immediately upon the signing of this memorandum.
